#25—September 5, 1980

HELLO NETWORKERS!

We are a little slow in getting out this current issue. We hope we compensate by including the new roster, a grueling task in composition for which we owe great thanks to Kristin Bedell, Vincent de Pillis, Linda Gardner, Nancey Leigh-Preston, Ann Markusen, Anno Saxenian, Erica Schoenberger, Paul Sussman, B.T. Washington, Marc Weiss, and David Wilmeth. Following the alphabetical entries you will find the geographical cross-references, which are divided into active and retired members. Please look carefully at the list of retirees for your area. They are people we have not heard from since January 1979. If you know them, warn them that they are being dropped from our list and urge them to write us if they want to stay on. Our apologies in advance if we have wronged anyone.

We had three reports of mail returned to people by our P.O. station during the first week of June. The post office can't figure out why it happened, and neither can we. Please send it to us again if this happened to you.

The next issue of the newsletter will be a focus issue on the question of the organizational future of the Network. Chester Hartman has been circulating a memo to folks around the country who have been active and interested in the last year in some sort of organization in addition to the newsletter. He will write up a summary of the ideas and experiences of various groups and individuals, which will constitute the bulk of the next issue. There seems to be strong interest in having a national conference in January 1981, in the Washington, D.C. area, to talk about the organizing of a national radical planners' group. People who wish to join in the discussion now can either write to Chester (by mid-September) or write directly to us for inclusion in the same issue.

This issue includes summaries of more regional conferences. In watching the comings and goings of Network members on our roster, we are struck by the important function that such conferences and organizational activity serve in keeping the Network strong. Members are still unduly concentrated in large urban areas in the more advanced industrialized states (anyone want to theorize why?), but the remarkable success that the Southeastern group has had in recruiting and bringing together progressive planners in their region (see the North Carolina listing) shows that a lot of good organizing can be done with a concerted effort!

We are a bit disappointed that we haven't received more feature material from Networkers. We'd like to do short articles (like our MX and hotel conversion pieces last time) and book reviews, but we need you to contribute.

We remain solvent. Each issue has been costing us about $500 and so far we have been recovering just about that much from your contributions. At the moment we have $1,500 in the bank, but by the time we pay for this double issue (including the roster), we'll be down to $500. So please continue keeping us entered in your checkbook. All contributions—large and small—are helpful.

Editorial staff for this issue are Marc Weiss, Linda Gardner, Patrick O'Donnell, and Nancey Leigh-Preston. Production was accomplished by Amy Glasmeier, Erica Schoenberger, Michael Storper, and Wendy Gleason, with our typesetters Hunza and printer into Print. I continue to juggle the overall process and so, for the Collective, thanks for your input and let's hear from you again soon!—Ann Markusen

NETWORK NEWSLETTER COMMENTS

From Hiyashi and Sidney Sugaya, Bay Area United Way, 410 Bush St., San Francisco, CA: “Ah I see the handwriting on the wall—bureaucracy vs. the personal touch. As much as I try to think of you all as a bunch of friends . . . etc. etc. it comes out more like a smoothly operating assembly line effort, with efficiency at the top and a real understanding of the worth of the newsletter at the bottom. Too bad, I guess that's what happens when things are shipped to reclusive Berkeley . . . .”

From Pamela Leindecker, 1214 E. Mifflin St., Madison, WI 53703: “Thanks for the work and time you’ve all been putting in. The fact that the newsletter remains a reality is a tribute to everyone who has put in time, energy, and money.”

From Mike Philips, National League of Cities, 1620 Eye St., N.W., Washington, DC 20006: “Glad to hear the Newsletter is in good enthusiastic hands . . . . Keep up the good work.”

From Peter McLaughlin, Urban Coalition of Minneapolis, 89 S. 10th St., Minneapolis, MN 55403: “The newsletter looks great and is greatly appreciated here in the heartland.”

From Diana Lee-Smith, P.O. Box 14550, Nairobi, Keya: “I agree with Neil Smith's suggestion about the need for a coherent focus and therefore, possibly, a radical planner's journal. However, the current format is also useful and must continue.”

NETWORK ORGANIZING

In this issue we are presenting an account of the Planners Network Regional Conferences which were held to assess interest and commitment in forming a national organization initially entitled “A Union of Progressive Planners.” Of the several regional meeting plans announced in Planners Network #22, five were held between February and May 1980: Boston/New England (2/20/80), San Francisco/West Coast (4/12/80), New Yorkland (2/20/80), San Francisco/West Coast (4/12/80), New York/East Coast (5/10/80), Chicago/Mid West (5/10/80), and Chapel Hill/Southeast (5/17/80). Out of the New York regional meeting came the formal resolution which is produced below. It is followed by an outline of the events which led to the regional meetings and the resolution’s formation, and by comments from persons involved in two of the regional meetings.
Those interested in obtaining the proceedings from the Planners Network Regional Conference held at Columbia University in May should contact Bob Beauregard, Dept. of Urban Planning, Livingston College—Rutgers, New Brunswick, NJ 08903. Please include $1.00 to cover costs.

TOWARDS A UNION FOR PROGRESSIVE PLANNING

WHEREAS the dominant mode of planning in the United States supports prevailing economic and political relationships, fosters the accumulation of private capital to the detriment of community welfare, and legitimizes the extant political and governmental structures which perpetuate the dominance of the many by the few, and

WHEREAS there is emerging in this country a loose coalition of individuals who hold a progressive ideology and who share the overall goal of a more progressive society devoid of class domination, racism, and sexism and of the types of environments and social, political and economic conditions they perpetuate, and

WHEREAS such individuals would be more effective if they shared ideas and experiences and had an organization through which to translate their ideas into actions, and

WHEREAS there does not now exist an organization of progressive planners which would facilitate communication, develop redistributive strategies, bring about a more progressive society, educate and train other planners and non-planners involved in urban struggles, and serve as a public presence for progressive planning practice,

THEREFORE, be it resolved that a Union for Progressive Planning be established which has the following characteristics:

GOALS AND ACTIVITIES

1. Articulate a progressive planning practice and theory in the United States through conferences, workshops, position papers, and other forms of mass education.

2. Speak out on substantive public issues through testimony to legislative bodies, position papers, legal actions, and press releases.

3. Provide organizational support for practicing planners and community groups wishing to improve their working conditions and/or to encourage progressive social change.

4. Work with community groups to identify the intricacies and consequences of various governmental and capitalist planning activities through workshops, and increase their effectiveness through technical assistance.

5. Work with community groups to develop feasible strategies for progressive planning.

6. Serve as a forum to bring together practitioners, students, academics, and others interested in progressive planning for the purpose of sharing experiences and ideas.

7. Collaborate with other progressive professional groups (e.g., National Lawyers Guild) in order to provide mutual assistance and to coordinate activities.

8. Foster ties with and be of service to labor unions and other working class organizations which share similar goals.

9. Develop organizational ties to and become involved in broader political struggles which take place in neighborhoods, cities, regions, and in the national arena.

MEMBERSHIPS AND FINANCES

1. Membership shall be open to all individuals who share the goals of the organization.

2. To meet the financial needs of the organization, each member shall be required to contribute yearly dues. Membership dues shall be adjusted to income (progressively, of course) and there shall be no status differentials in membership.

ADMINISTRATIVE STRUCTURE

1. The organization shall be national in scope with regional bodies as well as local 'cells.'

2. The national organization shall be governed by an executive board composed of representatives from each regional and local group, the number of representatives being based upon membership.

a. The executive board shall elect officers for terms to be determined.

b. Upon formation, the executive board shall draft by-laws to be voted upon by the entire membership.

3. Each regional and local body shall pay dues to the national organization in proportion to its membership; the remainder shall be retained for regional and local activities.

a. Regional and local groups shall elect officers responsible for calling meetings and coordinating various service activities.

b. Regions and localities shall be determined 'in practice.'

4. The national organization shall hold yearly meetings for educational purposes and for work on the organization itself. Regional and local groups shall be encouraged to hold more frequent meetings.

5. The national organization shall publish a monthly newsletter (in conjunction with the existing Planners Network newsletter), engage in political activities at the national level (e.g., lobbying, testimony before committees), and pursue funding for national, regional and local activities. Regional and local groups shall be encouraged to serve as support groups for progressive individuals and to engage in community education, local research, technical assistance, training sessions, conferences, forums, film series, and other activities devoted to education and action around substantive progressive themes.

6. The national organization shall institute actions to establish on-going liaisons with other national, progressive organizations; regional and local groups shall be encouraged to do the same at their respective levels.

TOWARD A UNION OF PROGRESSIVE PLANNERS: An Account of Regional Perspectives—by Edward Bergman (Dept. of City and Regional Planning, Univ. of North Carolina—Chapel Hill 27514)

In May of 1978, about seventy academics gathered in Blacksburg, Virginia to discuss the inadequacies of mainstream planning theory and to debate those new theoretical directions which would be required for a progressive planning movement to emerge. None of the major questions were resolved, of course, but the debate sharpened and clarified many crucial issues. More importantly, however, a sense of collectiveness was developed in those two intensive days and many in the group felt that this sense of collectiveness could become a vehicle for having positive effects upon planning education and for building an organization which would shape planning practice itself. The Blacksburg Conference ended with the self-selection of a steering committee to explore a continuation of three concerns: a subsequent meeting in one year, a forum for publications in the area of radical planning theory and practice, and an organized scheme for academic-based planners to provide technical assistance to progressive planning groups.
The following October (1978) a meeting of the steering committee was held in New York City. There it was decided to hold another conference. It was to take place at Cornell University in April of 1979. The conference would have many of the same themes as the Blacksburg Conference, but greater emphasis was to be placed on progressive planning practice and on increased participation by practitioners and students. The Ithaca Conference was a huge success by almost any measure: over two hundred and fifty people participated; there was a more diverse set of interests, viewpoints and backgrounds; and some of the most compelling issues were pursued further, albeit unevenly.

The level of collectiveness of the Blacksburg Conference did not—and in hindsight could not—develop at Ithaca. But, the participants were less timid with plans to go forward with the formation of a national organization for progressive planners. Before adjournment, a new steering committee was formed (with some holdovers) to implement the mandate of drafting a 'pre-constitution' for the proposed organization and of making the arrangements for a founding convention within a year.

The decisions made at the Ithaca Conference were communicated through the Planners Network Newsletter and a series of exchanges about the merits of holding a meeting to form a national organization were also published. In the meantime, certain steering committee members lost interest, and when the University of North Carolina group decided not to volunteer as host for the founding convention because of the nonratification of ERA in that state, the remainder of the steering committee postponed plans for a founding convention pending further discussion and a more widespread display of interest. At the APA Meetings, in Baltimore in October of 1979, an ad hoc committee met to determine how to proceed. It was decided that regional meetings would be held in the spring to gauge the extent and depth of interest in forming a national organization. Five or six meetings, each in a different region and with a critical mass of Network people, were to decide why, how, when and where we would proceed. The consensus, if any, from each of the regional meetings would be reported to all those interested through the Planners Network Newsletter. At that time, the steering committee would make a decision whether to go ahead with plans for a founding convention. The general purpose of the regional meetings, then, was to determine if enough interest existed for the formation of a national organization.

FIVE REGIONAL MEETINGS

About 350 people attended these five conferences; attendance patterns tentatively identify regions of stronger interest (S.F., N.Y.C., C.H. 100+/-) and weaker interest (Boston and Chicago 15+/- each). What follows is a selective accounting of regional views concerning a national organization and issues of regional importance. (Detailed accounts of regional meetings are available in recent Planners Network issues or from regional correspondents listed in this issue or in PN #22.

REGIONAL CONCERNS

People from the different regions have participated unequally in previous planning conferences at Blacksburg, Ithaca and elsewhere and therefore are at varying stages of development in their thinking about a national organization. To place the discussion of this possibility within a context of regional concerns, each of the meetings also offered panels, workshops or discussion round-tables which covered a range of topics. Included were regional versions of: previous activist planning (S.F.), community organizations and progressive planning (S.F.), local information sharing (Boston and Chicago), National Commission on Neighborhoods (Chicago), neighborhood development (Chicago), organizing community control and housing (Chicago, N.Y.C., C.H.), displacement (N.Y.C.), planning education (N.Y.C.), health (N.Y.C., C.H.), economic development (N.Y.C., C.H.), female/minority employment planning (C.H.), community design (C.H.), rural resources (C.H.), and solar/appropriate technology (C.H.).

PLANNERS NETWORK

In the process of discussing purely regional issues and determining the sentiment for a national organization, the role of Planners Network constituted an important background issue. For the Boston group, the most salient fact mentioned was that Boston’s Radical Planners Network had been dormant for 18 months and consequently the regional meeting tried to determine how it worked, who it served, and why it became dormant. In Chapel Hill, there appeared to be substantial interest in Planners Network among those who were unfamiliar with it (thanks to Chester Hartman’s careful presentation of PN’s history, aims, functions, etc.) and continued support for its current role from members of the Southeast Planners Network. Discussion of Planners Network per se seemed unnecessary at the San Francisco meetings perhaps because so many members were somehow involved with it: continued some success (or responsible for its current production); some discussion did revolve around how local networks could be more effective. The role of Planners Network received its greatest explicit attention in Chicago and New York, although each regional gathering posed strong alternative roles. The Chicago group likes the current Network just fine and finds no reason to expand or change its role. The New York gathering envisions: (1) an expanded role for Planners Network in linking educators and practitioners to expand planning’s progressive dimensions, and (2) Planners Network to be published in conjunction with a (proposed) national organization’s newsletter.

NATIONAL ORGANIZATION

The above discussion serves as useful backdrop for the central question: is there sufficient interest in a national organization and commitment to develop it? Based on my reading of the regional meetings’ answers to this question, I’d have to say the evidence is mixed: generally in favor, but cautious about commitment to implement. The following region-by-region summary (from least to greatest interest and commitment) illustrates this assessment.

The Chicago group posed the question numerous times during their meeting and each time it met with a general lack of response. The group seemed to hold an implicit but strong feeling in opposition to a national organization for any of several reasons. A general anti-organizational bias was noted, as well as anarchist preferences. A national organization would tend to invite undue academic influence and be preoccupied with theoretical concerns. Finally, such an organization might displace Planners Network or harmfully alter its useful role.

The Chicago group posed the question numerous times during their meeting and each time it met with a general lack of response. The group seemed to hold an implicit but strong feeling in opposition to a national organization for any of several reasons. A general anti-organizational bias was noted, as well as anarchist preferences. A national organization would tend to invite undue academic influence and be preoccupied with theoretical concerns. Finally, such an organization might displace Planners Network or harmfully alter its useful role.

The Boston group neither opposed nor supported the proposed national organization. Instead, it sought to review the risks and difficulties such an organization might face by trying to generalize about the loss in vitality of the Boston Planners Network Chapter. They note that appreciation of organization activities does not lead to sustaining participation; that organizational efforts tend to fall on too few shoulders; that the few active members with strong concerns for ideological and goal definition tend to lose interest. The very people necessary to make such an organization work are already committed to similar roles elsewhere. The group expressed hope that a revived local Network could help bring such people back together.

The Chapel Hill meeting yielded an enthusiastic endorsement of activities that would link progressive planners together at the regional and national levels. But since many of the attendees had not heard of Planners Network prior to the meeting or known of each other’s work before arriving in Chapel Hill, the meeting spent considerably more time creating linkages between progressive planners throughout the southeast and less time on
posing questions and discussing the preference for a national organization. Self-nominations were solicited to attend a “core group” meeting the following day which would continue work on the regional agenda and discuss the national organization in greater detail. This core group met and supported a national conference which would consider the purposes, structure, logistics, etc. of a national organization. Several concerns were registered (e.g., national-regional structure, political definition, primacy of planning practice issues, avoiding personal and institutional “burn-out”), but the group pointed to the pressing need to determine what the first/best step to forming an effective organization would logically be.

The San Francisco meetings debated a series of issues and arrived at several resolutions concerning a national organization. Much like the Chapel Hill meeting, the group that debated and resolved was smaller than the number attending earlier topic sessions. Debates revolved around the name of the organization, a concern that it not be tied to any specific political organization, and a concern that the loss of openness found in Planners Network be balanced against a “respected source of objective analysis” to worry Chief Planners. These and other debates were expected to continue. Three important resolutions were reached: (1) that there be an organization of progressive planners; (2) that the development of the organization be used to provide a forum to resolve debates on outstanding issues; (3) that a local steering committee be established to convene scheduled meetings to discuss further the development of the organization.

The strongest and most explicit endorsement for a national organization came at the New York City meeting. Following a preamble of whereas conditions, the group resolved that a Union for Progressive Planning be established. Included in the resolution were a listing of eight Goals and Activities, two Membership and Finances provisions, and eight points of Administrative Structure. In deciding upon the organization name, five votes were taken in plenary session to consider various terms (e.g., socialist, progressive) and alternative names (Progressive Planners Network, Association for Progressive Planners, Planners Union). It was the sense of the meeting that the New York regional group should propose to hold the national meeting to establish an organization. Four people were initially charged to pursue this proposal and to involve others as interested. Bob Beaugard, Bruce Dale, Harvey Goldstein and Tony Shuman. The full text of the New York meeting resolution should be read in its entirety elsewhere in this issue.

NEXT STEP

As initially planned, the regional meetings were to deliberate the question of a national organization and these deliberations were then to be distributed (herewith) to the full Network for further consideration. Chester Hartman has also taken the opportunity to subsequently explore ideas about a national organization with Network people during his summer itinerary and he will write up the efforts already underway. This account should be available in newsletter #26.

In the meantime Chester (DCRP, Univ. of North Carolina—Chapel Hill 27514) sends the following message to Networkers: “The various regional Network meetings . . . were one step in a process set in motion at Ithaca in April of 1979, to move toward formation of a radical planners’ organization out of (but not killing/replacing) the present Planners Network. Tentatively, we’re thinking of holding a founding meeting (of the national organization) at the 4-H Conference Center in Washington, D.C. next Jan. 9-11. So mark your calendars and be prepared to participate in the necessary discussions and preparation work if the whole thing is to come off.”

REPORT FROM THE SOUTHEAST PLANNERS NETWORK—by Donna Dyer and Bruce Knopf (Dept. of City & Regional Planning, UNC-Chapel Hill, NC 27514, (919) 549-0551)

If anybody has reactions, comments, or questions about the May conference, please write us or Planners Network. We want next year to be even better.

A summary of the first annual conference on Decentralized Development is available. Thanks to Roger Walden, we also have a series of eighteen slides available for presentations on your own interest that really tell the story of the conference.

Speaking of next year, the group met on Sunday, May 18, after the formal conference agenda, decided a steering committee should be formed to make sure the momentum continues.

**Please volunteer yourself** if you want to be a member of this regional steering by August 15. Any suggestions for the functions of this committee are also appreciated. One major function of the committee will be to make sure a conference happens.

Next year the conference also needs a place and a sponsor. (We don’t want to hog the fun in Chapel Hill!) If you are interested, please contact me.

One item I mentioned at the conference I want to re-mention. Several folks in the Raleigh-Durham-Chapel Hill area do technical assistance to community groups on an ad hoc informal basis, and we are interested in formalizing (somewhat) that technical assistance group. Some clearinghouse to hook up planners/assistants with neighborhood groups would be helpful. Membership would need a stable core, but each project would demand a different team of helpers. If you have any ideas of projects, how to market ourselves, organizational structure, examples of other groups you know of, or if you want to be a part of such a group, please write me or Planners Network with your thoughts.

Thanks for a great conference and a promise for the future. The group in the Research Triangle Area will make sure the Southeast Planners Network doesn’t die, but we would like to relinquish the responsibility to the steering committee of people from many places as mentioned above. Write to the Planners Network!

CANADIAN PLANNERS NETWORK—by Joy Woolfrey (Faculty of Arts, Geography, and Regional Planning, University of Ottawa, Ontario, Canada KIN 6N5)

“Have you heard about the Canadian Network set up recently? We have a group in Ottawa starting to meet, and preparing to take our turn putting out the Canadian Network Newsletter—production will be rotated from region to region.”

UNION OF PROGRESSIVE PLANNERS:A Comment—by Lawrence Guthartz (94 Jeffrey Lane, Oceanside, NY 11572)

“I would like to address myself to a small problem that seems to be developing from our ranks dealing with the regional conventions that have just been held. The problem is my understanding of why there should be a national organization set up that would serve the sole purpose of giving out information and opinions on various planning issues. I always thought that by being a planner and a socialist there would tend to be more of a commitment to take an active part in not only formulating opinion but in formulating action to back that opinion. There should be a way for a national organization to coordinate programs for positive action in housing, help formulate a national housing policy and give our information to the news media based on both action and policy. This would tend to give more credibility to a national planning organization as we have been discussing. If you were to ask me right now what type of programs I would recommend, I would honestly have to tell you that I don’t know, but I’d be willing to sit down and try to work out at least one well worked out program as a start. I would like to hear what others have to say on the matter.”
For the past three years, a group of people interested in urban, regional and land use issues from around the globe have been participating in the PELU newsletter, which was edited by Frank Moulaert in Belgium, Pat Wilson in Salinas in the U.S., and John Paez in Venezuela. The newsletter covered ongoing research, political actions and conferences; it also tried to include longer summary pieces of people’s research when possible. The newsletter became difficult to coordinate among the three international editors, so at this past June’s political economy sessions at the World Regional Science Congress, a majority of the network’s members attending, the PELU group voted to join the Planners Network. This will avoid duplicating material and hopefully will enrich the Newsletter.

PELU members not present at the Cambridge meetings have tentatively been included on the current Network mailing list, but should know that continued membership requires your active participation, i.e., we need to hear from you about your activities, interests, etc. at least once a year. We are also always in need of contributions. International mailings are particularly expensive (we always mail first class), so a $5, $10 or greater contribution a year would be greatly appreciated.

NATIONAL TENANTS UNION CONFERENCE—by Alison Brennan (120A Connecticut St., San Francisco, CA 94107)

On June 20-22, tenant activists from around the country gathered in Cleveland to begin forming a national tenant organization. More than 300 people attended this meeting and, while a disproportionate share of them came from the East and West Coast, many folks came from places where it’s not ordinarily thought there’s a lot of tenant activity.

The June conference was a follow-up to the National Committee for Rent Control meeting held in New Jersey last November. At that meeting, attended by about 90 people, we decided to form subcommittees to deal with both the policy and the structure of a future organization and a working group to plan the June conference. Both subcommittees were to come up with recommendations for the June meeting. We also decided at the November meeting not to put on three days of discussion about by-laws, but that plenty of time and discussion should go into workshops on housing issues and general information sharing.

The workshops at the June conference included: Organizing (everything from buildings to statewide organizations), rent control campaigns, gentrification and displacement, community development and so on. In addition, groups were invited to set up tables for distribution of literature, as well as selling T-shirts, pamphlets, etc.

The conference also held hearings on the proposed by-laws/structure for the organization. Most folks managed to attend one of these hearings, which were to help formulate the discussion for the final plenary. These discussions pretty much resolved the major issues before the plenary on Sunday.

What came out of the conference was an Executive Committee elected by region and plans for regional conferences, as well as two projects for the next year. The first is collecting all of the available information around specific areas of interest to tenant groups (rent control, for instance), making some kind of organized packet and distributing it to local groups. The Executive Committee is also charged with investigating the possibilities for a National Tenants Day, where local groups around the country would have some kind of demonstration, rally or other event to bring national attention to the housing crisis.

Next year’s NTU conference will be held on the West Coast. For more information contact NTU c/o SHELTERFORCE, 380 Main St., E. Orange, New Jersey.

NEW YORK AREA NETWORK FILM FORUM—by the New York Area Planners Network, Bruce Dale and Tony Schuman, coordinators (56 West 22nd St., New York, NY 10010)

“Many members of the network kept in touch this year by attending the monthly sessions of the Network/Forum series. Sponsored jointly by the N.Y. Area Planners Network and the Forum on Architecture, Planning and Society, this year’s Network/Forum presented a coherent series of presentations on the historical development of cities. Called ‘Cities at Six’ (a reference to our starting hour), the series adopted a format of film plus speaker, and drew a consistent turn-out of 100 people. Our speakers included Harry Magoff on industrial towns, David Gordon on urban economics, and Manuel Castells on strategies for political change. While several participants felt that the speakers, and these three in particular, were more stimulating than the films, there was general enthusiasm for the film/speaker format. It also gave us a chance to screen some classic documentary films on urban history. On the chance that other Network members may be interested in the film literature on cities, the following is a brief review of the films we used, together with information about film rentals:

**Man With The Movie Camera.** This experimental Soviet film by Dziga Vertov has a double goal; to describe the city (Moscow) as the context for ‘the ordinary people filmed in everyday life and work’ and to explore the creative possibilities of the medium in a dialectical manner which highlights the process of making the film as well as the finished product. A fascinating, constructivist recording of the shifting rhythms of a working day in the city (67 min., silent; 1929; Museum of Modern Art, N.Y. $40).

**The Joyless Street.** This German film by G. W. Pabst contrasts the decadent rich with the starving poor in inflation-ridden Vienna in the 1920’s. Although the film hedges its depiction of class struggle with the introduction of a Yankee G.I. hero, it is an absorbing film with wonderful sets and introduces a young actress named Greta Garbo (120 min., silent; 1929; Museum of Modern Art, N.Y. $40).

**Industrial Britain.** A nostalgic look at the importance of craft in the machine age, this film is more interesting pictorially than analytically. It was made by John Grierson and Robert Flaherty, two pioneers of documentary film (22 min.; 1940; Museum of Modern Art, N.Y. $15).

**The City.** The classic liberal view of our urban history, from New England village, industrial town, and giant metropolis to the garden city (Greenbelt, Radburn) alternative advocated by Lewis Mumford, author of the narration. Made for the 1939 New York’s World Fair, the picture frames the problem as a struggle between ‘man’ and technology, without suggesting class divisions within human society. Made by Ralph Steiner and Willard Van Dyke with music by Aaron Copland, the film is an important historical document and useful for initiating discussion, facilitated in our series by David Gordon.

**Halstead Street.** A rare piece of documentary footage shot in Chicago during the Depression identifying the spatial segregation of the city along ethnic and national lines. Made by the Chicago Workers Film and Photo League, the film includes some amusing cinematic editorializing (11 min., silent; Thomas Brandon, Teatown Road, Croton, N.Y. 10520; $30).

**Bologna: An Ancient City for a New Society.** Part of the National Film Board of Canada’s Urbo 2000 series, this film offers a disappointingly thin survey of housing, planning and social services in Italy’s communist showcase city. The film loses much of its impact because the Italians are interviewed in French with a voice-over narration in English. Not recommended unless supplemented by a knowledgeable speaker (60 min.; National Film Board of Canada, N.Y.; $50).

**Our Cities, Our Right.** This film, written by French sociologist Henri Lefebvre, indict speculative development for the de-personalization of the built environment of Paris. While raising an important critique of capitalist urban environment, the film neglects the spatial segregation of the broader metropolitan...
area, and makes no reference to current community struggles or strategies for change (26 min.; 1975; New Yorker Films, 16 W. 61st St., N.Y.; $75).

We welcome ideas for next year's series and would especially like to hear from any Network members who would like to present their own material if you will be in New York sometime between November and May. We also welcome financial contributions to Network/Forum, which may be sent to Bruce Dale or Tony Schuman at 56 West 22nd St., New York, N.Y. 10010.

NOTE TO THE NETWORK (We are reprinting the following letter to elicit your comments on the proposal, as it would involve a change in the Newsletter. Please let us know what you think. This letter is from Greg Parston, 46 W. 90th St., New York, N.Y. 10024)

Dear Planners Network:

I am writing on behalf of the Progressive Caucus for Health Planning to pursue the possibility of Planners Network's sharing space in its newsletter with the Progressive Caucus.

The Progressive Caucus, as you probably know, is a coalition of planners, consumers and providers who believe that health planning can be an active forum for progressive change in the health care system. The Caucus represents interests which historically have fought for progressive change and social justice and which hold that a physical and social environment which is conducive to good health and well-being is a basic human right.

One of the ways in which the Caucus is attempting to strengthen its commitment to progressive change in the health care system is by establishing a medium through which its members can regularly contact each other to share information; to give technical and political advice; to help initiate state health planning support groups; and to alert sympathetic, resourceful advocacy organizations to the plight of struggling planners, volunteers and agencies. As a result, the Caucus has been working for some time on developing a newsletter, much like Planners Network.

Some of the Progressive Caucus people involved in the newsletter effort are also members of Planners Network and have sought closer links between the two. Among the resolutions adopted at the Planners Network Regional Conference (Towards a Union of Progressive Planners) at Columbia University in May, one concerned with health planning issues raised the possibility of our closer cooperation with the Planners Network, including possible shared Planners Network Newsletter space and joint activity toward a national Planners Network Organization; and of joint educational presentations and outreach communications.

At its meetings in San Francisco, the Progressive Caucus supported this resolution and established a communications committee with responsibility for follow through on the possibility of sharing newsletter space with the Planners Network. This letter is the start of that follow-through.

Communication among health planners is, in fact, already taking place largely within Planners Network. The last few issues of Planners Network Newsletter have included letters from members concerning health issues. The Progressive Caucus would like to build on this communication, grouping these types of letters with others into a page or two in Planners Network which could be devoted to health planning. Among the advantages of this approach would be (1) gaining strength from an already established network of progressive planners and (2), perhaps more important, helping to develop within that network stronger links between health planners and other types of planners, aiding a realization of their common struggles and concerns.

Should you agree to the Progressive Caucus sharing space in the newsletter, the Caucus will prepare necessary material, do any typing, etc., for inclusion in each issue. The health-Planners Network people are aware that extra printing costs, etc., might have to be borne by the Caucus for the first (few) issue(s). Hopefully, the increased distribution of Planners Network (to Progressive Caucus members) will result in sufficient additional contributions to Planners Network to offset subsequent costs.

We have already prepared some material for a first newsletter. If you do think this sharing idea could work out, we could ready that material (to your specifications) for the next issue of Planners Network.

I hope you agree that this could be a useful step in bringing together progressive workers in planning. Looking forward to your response.

"Women and the American City," the Spring 1980 issue of Signs, Journal of Women in Culture and Society, makes an exciting and important contribution to both women's and urban studies. Examining urban life from a feminist perspective, the contributors focus both on how urban phenomena affect women, as well as how the structure of patriarchy (and sometimes capitalism) have influenced the American city and its suburban outgrowths. Equally significant, the contributors are attempting to provide answers to the new questions this examination raises, and to create maps for restructuring the urban environment to more effectively meet the needs of women.

This is especially important because, as several articles document, women are comprising an increasingly greater percentage of the urban population, as well as a growing proportion of such traditional planning client groups as the elderly, low-income and unemployed. This fact alone, if nothing else, demonstrates why this issue of Signs is relevant reading for all planners, not only those who consider themselves feminists.

There is a clear message that women should be concerned with One of the ways in which the Caucus is attempting to strengthen urban policy (or lack thereof) because of its impact upon them. If, as this issue states, many urban problems—especially as they relate to women—are caused or exacerbated by sexism, then an acknowledgement and understanding of this is a required first step towards developing real solutions. Failure to take this into account has often meant that the solutions of urban policy makers have, in fact, compounded the problems of women and cities.

Jo Freeman's article, "Women and Urban Policy," illustrates the interdependence of women's and urban problems. She writes, "The concentration of women and female-headed families in the city is both a cause and consequence of the city's fiscal woes. . . ." (p.S-13), and explains that women are attracted to cities because it is easier and cheaper for them to live there. However, because their job opportunities are limited, women earn less than men and are unable to make equivalent contributions to the tax base. One strategy Freeman proposes to aid the economies of central cities requires fighting against employment discrimination. Some of the basic approaches to planning the city and suburb as we know them today (i.e., in the areas of land use, transportation, housing, employment, and health) are placed in question by the research on the links between women and the city found in this issue.

Underlying the critiques of urban policy, the historical analyses, case studies, and strategies for change documented, are three hypotheses: "The American city has both enhanced and constricted women's lives; the experience of men and women in American cities is quite significantly different; and finally, studies of such divergences and their effects are original and provocative," (p. S-I). It is not possible to cite in a short review all of the material supporting these hypotheses. However, the articles range from examinations of "Women and Urban Policy", "Women in Urban Parks", "Older Women in the City", "Masculine Cities and Feminine Suburbs . . .", Crime, Women and the Quality of Urban Life", and "Working Women and City Struc-
ture..." to an imaginative essay on what a non-sexist city would be like. Housing, employment, family structure, and leisure are all examined through a feminist lens. The volume also includes a "review essay" on the scholarship to date on women in the urban environment, as well as two book reviews on works of importance in the field.

"Women and the American City" represents a significant foray into a huge intellectual frontier, successfully mapping out some of the future paths of research to be explored. However, it does not-nor could it be expected to cover all of the areas of concern. One of the research questions excluded is the effect on women's lives of energy issues and environmental hazards evolving from increased urbanization and industrialization. Another question worthy of more comprehensive examination is the relationship of past and present economic development activities in the city to women.

This collection of studies on the ways in which women and the American city interface is, indeed "original and provocative." Serious doubts are raised about whatever progress has been made under the guise of planning for, and solving the problems of, America's urban environment. As Gerda Wekerle writes, "The new research on women in the urban environment is very radical in its implications. As in other fields where women have been neglected, this new work has the potential of requiring fundamental changes in some of the most basic elements of the modern city." (p. S-212). "Women and the American City" will make an excellent foundation for those who wish to understand and work towards solving the problems of women and the urban environment. THE WOMEN'S SCHOOL OF PLANNING AND ARCHITECTURE—by Linden Burke (3011 Shattuck Ave., Berkeley, CA 94704)

The planning committee for the Fifth Session of the Women's School of Planning and Architecture (WSPA) has decided to postpone the session from July 1980 until February 1981. WSPA is a private non-profit corporation funded primarily through tuition. Registration for the July session was lower than expected. Postponing the session is necessary in order to make it more financially feasible and professionally rewarding.

After several years of organization building, WSPA is ready and able to begin outreach. We intend in the upcoming year to strengthen and enlarge networks at the regional level. We hope to increase WSPA membership and to become a resource that can be tapped by neighborhood and community organizations.

As a professional group of women involved with environmental design and planning we have a unique perspective and many skills to share. Past WSPA sessions have provided an alternative learning experience for women in all environmental fields such as architecture, construction, environmental psychology, housing, interior design, landscape architecture, neighborhood development and planning.

WSPA strongly believes that the planning and design professions have traditionally tended to overlook the needs of women, particularly low income women. The purpose of the Spring 1981 Conference will be to focus on the development of the total urban and rural environment with a feminist perspective. We intend to bring women together to plan for better housing and communities. We will examine current development policies and how they impact on women. The Conference will provide an opportunity for women in environmental fields to meet with federal policy makers.

The Conference program will include four major topics: Communities: Housing and Women, Access to Money: Economic Development, Alternative Technologies, Influencing Academia Toward a Feminist Perspective. We will hold a series of discussions and workshops on each of these topics.

Although the architecture and planning profession has been and remains a male dominated field, women in the environmental fields are invigorating the profession with unique ideas and contributions to alleviate the many problems facing women in housing and urban development. We look forward to the advancement of feminist solutions and feel that the Women's School of Planning and Architecture will continue to provide a forum for debating these solutions.

WORLD REGIONAL SCIENCE CONGRESS: A Report—by Ann Markussen (DCRP, U.C. Berkeley 94720)

The first organized political economy sessions took place at the Congress in Cambridge, Massachusetts in June. We had a day and a half of sessions which were loyally and volubly attended by forty to fifty left "radicalists". Among substantive issues debated were the progresses of regional struggles in different parts of the world, the validity of a theory of regionalism on the Left, the significance of the "new international division of labor" for left research and politics, and the politics of non-traditional working class groups (Mexican peasants, unemployed Chicanos in the Southwest) in urban and regional struggles. The group also debated its future work, including its relationship to the Regional Science Association. We decided to continue communicating through the Planner's Network, to plan for a Conference in Brazil in winter 1982 (information in this proposal will appear in forthcoming issues), and to continue to hold political economy sessions within the Regional Science Association meetings in years to come.

NETWORKING

FEMINISTS passing through London, England might want to check out the Women's Research and Resources Center (WRRC) at 190 Upper St., London, N 1 (Tel.: 359-5773). According to Gail Chester, "It is situated above Sisterwrite, a feminist bookshop, and there is also a women's cafe there, so it is a nice place to visit when passing through."

TAX REFORM (from Paul Ryder, Ohio Public Interest Campaign, 340 Chester-12th Building, Cleveland, Ohio 44114): The Ohio Fair Tax Initiative, a statewide tax reform proposal sponsored by the Ohio Public Interest Campaign, provides for $161 million in property tax relief for homeowners, renters, and family farmers, and raises $650 million for schools and services. OPIC estimates that, while the proposal would moderately increase income taxes for a limited number of families, the rates would affect only about 10% of the state's population. Higher corporate taxes and closed loopholes account for the bulk of the new revenues. When the State Senate recessed in April, it had not yet voted on the initiative. Write the Ohio Public Interest Group (address above) for updated and more information.

ENERGY PLANNING (from Peter McLaughlin, Urban Coalition of Minneapolis, 89 S. 10th St., Minneapolis, MN 55403): The Urban Coalition of Minneapolis (UCM) "was instrumental in strengthening a one-year old state law requiring all residential rental property to make any improvements which will pay for themselves in energy savings on 10 years or less. The City of Minneapolis has passed an ordinance permitting City Housing Inspectors to enforce these standards." UCM is also working on an innovative energy design for a low and moderate income housing development. Smaller scale means of cogeneration or district heating will be explored. Ideas and suggestions are welcome.

Finally, UCM is working to have employment and economic development goals and programs incorporated directly into both Minneapolis and State of Minnesota energy policies and activities. Ideas on the way government can help nurture the necessary types of development are urgently needed."

SAN FRANCISCO COMMUNITY ENERGY COALITION (from Karen Commanday, 141 Hancock St., San Francisco, CA 94114, (415) 626-7024): "SFCEC is composed of community based organizations, non-profit groups, and individuals working to develop and coordinate funding and technical resources, and to push for a comprehensive energy policy for San Francisco. The Coalition addresses energy conservation strategies for low-income households and landlord/renter situations. Contact me for more information."
Compounding these problems is the expected expiration of the existing rent control law. I would like to hear from people who have been involved in rent control campaigns and who have developed legislation which could be implemented elsewhere. I would also be interested in any studies which concentrate on examining the impact of rent control on vacancy rates, new construction, abandonment, etc.

WORKING WITHIN THE STATE (from Joel Friedman, 1864 Wyoming Ave. NW, Washington D.C. 20009): "Life in Washington continues to be a struggle with surviving within the Bureaucracy, working on local housing issues, and attempting to maintain contact with the "theoretical" world surrounding urban issues. Although working at HUD does offer opportunities for progressive activities, it is tremendously telling on the soul. The day to day frustrations are supplemented by the long-term, and deeper, sense of futility of being an island in a world of paper-pushers. I am especially interested in exploring the conduct and uses of urban research within the state and the possibilities for moving such research towards meaningful goals. I would encourage anyone coming to Washington and interested in the benefits and detriments of working for the state to call or write me. Also, if I can be of any assistance to anyone needing information on or from HUD, please contact me and I'll see what I can do."

ADVOCACY PLANNING (from Sandra Bolker, P.O. Box 3968, Ventura, CA 93003): "I am employed by the Ventura County Commission on Human Concerns and Community Development. As part of my duties with the Commission I am developing an advocacy plan for the Community Action Agency. I would be grateful for any information you could send me regarding the following: Advocacy/Networks/Coalitions: Community-agency coordination: 'How-to' information on getting organized; State/Federal funding sources for this type of planning."

DOGS IN PARKS (from Pamela Leindecker, 1214 E. Mifflin St., Madison, WI 53703): "I'm wondering if anyone in the Network has information of dog ordinances in relation to city Parks Departments. Specifically, Madison Parks Dept. is attempting to alter a natural-wooded area that has been used by people for hiking and running dogs for over 10 years. Included in their plan is to not allow dogs. 800 people signed a petition to keep the park as it is. Currently, there are more than 32 parks within the city area that are developed and dogs are not allowed. Anyone with information in this subject, I'd appreciate hearing from you."

URBAN GARDENING: Information on Urban Gardening is available from Libby Goldstein, Philadelphia County Extension Service, SE Corner, Broad and Grange St., Philadelphia, PA 19141.

COOPERATIVE HOUSING (from Nancy Kleniewski, 3308 Baring St., Philadelphia, PA 19104): "I live in a small (5 building) housing co-op and would be interested in swapping information about the organization of the co-op, financial problems, etc. with others who are attempting to build co-ops."

PAPERS SOUGHT (from Terry L. Campbell, 3010 Santa Monica Blvd., Suite #169, Santa Monica, CA 90404): "Papers and references are being sought regarding current federal grantee management program operations, and any materials dealing with the role of committee work in the planning process."

RESIDENT-CONTROLLED MULTI-FAMILY HOUSING (from Ann Silverman, 47 Inman St., Cambridge, MA 02139): "We've been working with the local HUD office on a Demonstration Program to involve residents in the sale and possibly in the future ownership of five foreclosed subsidized developments. As part of this . . . we've written a handbook which looks at five ways low/moderate income residents can own/control these properties in the future . . . While oriented towards HUD housing, the material on forms of ownership, how to modify them to suit your needs, and steps in a planning process may be helpful to other groups considering ownership or control. Planning for the Future of HUD-Owned Housing is available for $3.00 per copy from Citizens Housing and Planning Assoc., 7 Marshall St., Boston, MA 02108."

HOUSING/CONDOMS/RENT ORDINANCES (from Olivia Clark, 327 W. 5th #3, Eugene, OR 97401): "(1) The Lane County Progressive Alliance, a newly formed citizens' action organization in Eugene, Oregon, is composed of approximately ten task forces concerned with a range of issues: transportation, energy, housing, etc. Each task force hopes to develop and introduce progressive ordinances to the city and county governments. The Housing Task Force would appreciate receiving information from other cities/counties concerning: anti-speculation taxes, rent control, condominium and cooperative conversions, discrimination in housing, etc. Has your city passed an ordinance concerning any of these issues?" Contact Olivia Clark at the above address. "(2) Eugene's Neighborhood Housing Resource Center would appreciate receiving information concerning condo and cooperative conversion ordinances. How does a city concerned with displacement construct an ordinance that does not inhibit the development of limited and non-equity housing cooperative conversions? We need examples of how other cities have dealt with conversion and displacement problems. Does anyone have a list of cities that have condominium conversion ordinances? Is there some sort of clearinghouse or network for this sort of info sharing? Contact NHRC, P.O. Box 30053, Eugene, OR 97403."

CITY HOUSING PLATFORM (from Nancy Kleniewski, 3308 Baring St., Philadelphia, PA 19104): "I am a member of the Democratic Socialist Organizing Committee, which in Philadelphia is currently writing a housing platform for City Council legislative action. It includes issues of interest to both homeowners and renters, women and children as well as men, racial minorities and white households. We are in the process of trying to form a coalition of neighborhood and housing groups to get the platform introduced and through Council. I will send copies to people interested."

NEIGHBORHOOD ORGANIZATION RESEARCH GROUP: The purposes of NORG are: (1) to encourage research on neighborhoods, neighborhood organization and government; and (2) to serve as a vehicles for the exchange of information among academics, public officials, and neighborhood leaders. NORG members receive a quarterly bulletin containing information on relevant conferences and activities, information exchange and referral among members, reviews of recent literature on neighborhood issues and organization, and a listing of current research publications and activities. Bibliographies on neighborhood organization and research also available. For more information write NORG, Workshop in Political Theory and Policy Analysis, Indiana Univ., 814 E. 3rd St., Bloomington, IN 47405.

NEIGHBORHOOD GROWTH AND DECLINE (from Charlie Hoch, Dept. of Community and Regional Planning, Iowa State University, Ames, IA 50010): "At the Midwest Planners Network meeting in Chicago on 5/10/80 [for more information on regional conferences, see Bergman in this issue] one of the major discussion items was about ways to link theories about community/neighborhood growth and decline with the practical political and organizational efforts of planners in metropolitan neighborhoods. I offered to continue the efforts in this direction by collecting anecdotal case study material and theoretical material and then putting the two together in a working draft. This draft would then be circulated initially among midwest members and be used as a focus for discussion and workshops in our next major conference/meeting. The intent is to begin the process of building documentation that bridges the theory/practice gap in planning for metropolitan neighborhood areas.

"I would like to ask those of you who know of either applied or theoretical studies, reports, articles, etc. treating the subject of neighborhoods growth and decline and/or the efforts to plan for neighborhoods to send me a copy or a citation of the work. I am particularly interested in personal experiences, planning reports, newspaper articles and other sources which do not circulate nationally. I will organize this information into a reference file that hopefully will be ongoing and serve as an information resource available to Networkers at regional conferences."

UTILITY REFORM (from Mike Philips, National League of Cities, 1620 Eye St., NW, Washington, DC 20006): Mike Philips writes that he has gathered like-minded people who have creative ideas about utility reform, especially ideas for national legislation."

PLANT CLOSINGS (from Stephen Klein, 9 Greenough Ave., Cambridge, MA 02139): Stephen Klein writes that he is very interested in getting in touch with anyone involved or interested in legal tactics for communities and workers to prevent plant closings.

MIAMI RIOTS/BOAT PEOPLE (from Ken Lipner, 1241 NE 87th St., Miami, FL 33138): Ken Lipner writes that he will be glad to exchange information with Network members interested in researching the cause and nature of the Miami riots or the Cuban or Haitian boat migration.
ALTERNATIVE/DEMOCRATIC WORK (from Steven Boss, 526 West 112th St., N.Y., NY 10025): "I am interested in cooperative work process. I am a board member of Project Work, a NYC organization that serves as a clearinghouse on democratic work processes and that provides technical assistance to cooperative organizations and businesses. Anyone interested in alternative/democratic work or who needs t.a. in developing a democratic workplace in the NYC area (or who wants to receive the Project Work newsletter) should contact Project Work, 339 Lafayette St., NYC 10012, (212) 777-0200."

COURSE ON D.C. HOUSING CRISIS (from Joel Friedman, 1864 Wyoming Ave. NW, Washington, DC 20009): "Two friends and I are planning to teach a course for local housing activists, planners, city employees, tenants, etc. which will attempt to: (1) discuss the current housing crisis in a manner which illuminates the assumptions that the popular press, the government, academics, etc. make in their usual discussion of the issues; (2) develop research/analytical skills necessary for effective neighborhood/housing organizing; and (3) develop theoretically an argument which places a number of urban problems (gentrification, abandonment . . .) within a context of sectoral capital flows (in and out of the housing market, the various money markets ...) and spatial capital flows (in and out of distinct neighborhoods). Any information, especially on the third point, would be helpful."

A CALL FOR SYLLABI (from Pat Wilson Salinas, Community and Regional Planning, University of Texas, Austin, TX 78712): "In putting together an introductory graduate course in urban and regional theory, I would appreciate receiving recent progressive syllabi recommended by Networkers. I have available now for anyone interested, the syllabus on planning theory which I put together last year with input from Networkers."

ECONOMIC DEVELOPMENT PLANNING (from Pat Wilson Salinas, Community and Regional Planning, Univ. of Texas, Austin, TX 78712): "Starting this Fall, Masters students in Community and Regional Planning at the University of Texas may elect to specialize in economic development planning—with either a U.S. or Latin American focus. Since the curriculum is still quite flexible, I would like to find out from other Networkers what kinds of courses they would like to see included in such a program, and what other programs are offering."

RADICAL URBAN SOCIOLOGY (from Nancy Kleniewski, 3308 Baring St., Philadelphia, PA 19104): "I have copies of a radical urban sociology course I taught last semester, if people want to see it. It applies some of the current theory to Philadelphia's recent loss of population and employment."

THE CAPITALIST STATE AND THE ORIGINS AND DEVELOPMENT OF PUBLIC ADMINISTRATION (from Ron Saklofsky, Brookens 436, Sangamon State University, Springfield, IL 62708): Ron Sakolsky would like critical feedback from Networkers on his paper on the above title. He'd also like to hear from others working in this area of study. Write for copies of the paper.

APARTHEID IN AMERICA (from James Kushner, Southwestern University School of Law, 6755 S. Westmoreland Ave., Los Angeles, CA 90005): "My book Apartheid in America will be published in early to mid-July by Carrollton Press. In addition to the legal analysis and recommendations for new judicial standards and legislative initiatives to dismantle racial segregation, the first part is of particular interest to planners. It's a history of government policy affecting the growth and perpetuation of residential segregation, a kind of soup to nuts from post-civil war industrial and immigration policy through urban impacts, UDAGS and internal revenue regulations. For those involved or interested in the intractable problem of segregation, the history of the Supreme Court's approach to race from Dred Scott to Bakkes should be useful."

REHABILITATION CO-OP CONVERSION (from Peter McLaughlin, 89 S. 10th St., Minneapolis, MN 55403): Powderhorn Residents Group, a nonprofit housing development organization, is "on the verge of completing a substantial rehabilitation co-op conversion of a school building (45 units: 9 one-bedroom, 26 two-bedroom, and 10 three-bedroom). It also looks like we will obtain a 12-unit building for moderate rehabilitation and ultimate conversion to a limited equity build-up co-op."
HEALTH PLANNING SUPPORT GROUP (from Debbi Nomagi, 2621 Rooke Ave., Honolulu, HI 96817): "Are there health planners in the network involved with the Progressive Caucus for Health Planning? If any are interested in joining the Health Planning Support Group, their correspondence address is c/o Consumer Coalition for Health, 1751 N. St. NW, Washington, DC 20036. I am trying to establish progressive contacts on the Hawaiian Islands, and would like to hear from fellow Networkers."

RURAL COMMUNITY ECONOMIC DEVELOPMENT (from Russell Libby, National Center for Economic Alternatives, 2000 P St. NW, Washington, DC 20036): "I am doing a study of federally funded community development corporations and would like to hear from Networkers who are doing or who have done research on rural community economic development. I am interested in theoretical work, case studies, literature review, etc."

COMPUTERS IN THE COMMUNITY (from Steve Johnson, The Portland Community Resource Center, 1723 N.E. Tenth, Portland, OR 97212): "I am working on a research project on the current and possible future uses of computers by non-profit and community organizations. I would like to hear from other Networkers who know about, are working on, or are interested in this topic. Is there a network of planners dealing with computer use for the community? Especially systems that are used by community organizations, for example the geo-coded community information base offered through public libraries in Seattle. I have been in touch with the Urban and Regional Information Systems Association—are there other groups like them? Our study is for the city of Portland, Oregon, and for the Neighborhood Information Sharing Exchange (NISE)."

HUD-BACKED NEIGHBORHOOD DISPLACEMENT (from Arlene Zaremba, staff attorney, Legal Services of Eastern Missouri, 607 N. Grand Blvd., St. Louis, MO 63103): "For your information, since you are working on the Legal Services for the Legal Services Corporation. I am enclosing a paper which I wrote recently for community groups concerning HUD's Regional Mobility Program. Since writing this paper, I have learned that similar Mobility Programs are on the way in several other American cities under HUD's sponsorship. These mobility programs are nothing more than population dispersal and displacement programs being larded up by HUD. There are some typographical errors in this paper, but I wanted to get it to you right away for your information. In St. Louis the local Regional Planning Agency has voted not to participate in the Mobility Program."

CITIZEN INVOLVEMENT AND URBAN SOLAR ENERGY (from Jay Vogt, community development specialist, Suffolk County Cooperative Extension Service, University Downtown Center, Boston, MA 02125): "I am working on a center for groups: (1) The Citizen Involvement Training Program—a Mass. Extension training resource program to impart skills in organizing, fund-raising, education, and media for community groups. CITP's address is 136 Hsbruck Hall, Univ. of Mass., Amherst, MA 01003. (2) The Urban Solar Energy Association (USEA)—a nonprofit corporation with over 550 members who promote and build low-cost solar installations in Boston. You can subscribe to their newsletter for $3.00. Their address is 137 Broadway, Somerville, MA. The two projects are related by a Kellogg Foundation grant which funds CITP to train agents like myself in working with groups like USEA. We hope to implant progressive training skills in the Extension Service and disseminate the process as a model nationwide."

RECREATION PLANNING IN THE U.S. VIRGIN ISLANDS (from Charlotte Strem, Bakery Square Bldg., Suite 103, St. Thomas, VI 00801): "In July 1979 I left Santa Cruz to take a job with the Dept. of Conservation and Cultural Affairs in the U.S. Virgin Islands. My initial responsibility was to prepare the five-year outdoor recreation plan for all three islands (St. Thomas, St. John and St. Croix) with citizens' groups on each island. Since then, I've been promoted to Administrator of the Policy and Planning Unit, which covers long-range coastal zone management planning, the development of the territorial park system, as well as long-range recreation planning."

"Before you all start fantasizing about 'America's Paradise' (as the license plate contends) and think recreation planning means sitting on the beach, let me inform you as to a few realities of life here. The Virgin Islands is a U.S. territory, 40 miles S.E. of Puerto Rico. It is a major tourist resort, and port for cruise ships. During the peak season (Dec.-Apr.), there are often up to 11 cruise ships in the harbor, bringing 500-1,000 passengers each. The new Norway (2,000 passengers) is now scheduled to come every Thurs., and the Queen Elizabeth II (1,800 passengers) also comes to port occasionally. The tourists mainly flock to Main St. to buy tax-free cigarettes, liquor, jewelry and T-shirts. The airport is being expanded to enable larger jets to land. As with every tourist area, there is animosity mixed with the hospitality."

"Life here has its problems—severe water shortages, power outages, unemployment, a high drop-out rate, and a fragile economy. There is a small town atmosphere, and a stifling feeling that everyone knows who everyone is doing, and with whom. But also there's a tradition of greeting everyone with an "OK" in passing."

Professionally, the government often has to hire "Continents" from the states to perform various technical duties. The League of Women Voters is the most politically active organization on the island—watchdogging the progress (or lack thereof) on the Comprehensive Plan and highlighting other issues of concern such as the proposed highway and the latest attempts to deal with the water crisis. There is little or no planning to speak of going on. The Planning Office has had a mandate to come up with a Comprehensive Plan for over a year and has not made any real progress. Consultants brought down to do the job are highly criticized. Issues that the planning office should be dealing with, such as three different proposals to fill parts of the harbor for an expanded cruise ship dock, the highway, and expanded port facilities, are not discussed, nor are they evaluated for their cumulative impact. Land use decisions are made in the political arena rather than based on an evaluation of the long-term goals and needs of the island."

PUBLICATIONS

WOMEN AND ENVIRONMENTS NEWSLETTER is published three times a year. It contains articles, reviews, and network information. Subscriptions ($5.00/ year) can be obtained c/o Faculty of Environmental Studies, 4700 Kelle St., Downsview, Ontario, CANADA M3J 2R2.

NEW SPACE FOR WOMEN, a collection of essays on women and their environments, has been edited by Gerda Wekerle, Rebecca Peter­son, and David Morley. It can be ordered from Westview Press, 5500 Central Ave., Boulder, CO 80301 ($26.50).

ALTERNATIVE CURRENTS, originally published as a newsletter, has expanded to a full-scale magazine. It describes itself as “the New York metropolitan region’s only magazine specializing in appropriate energy and the urban environment.” It contains feature articles, regular columns, and a calendar of events. For information, write 156 5th Ave., Room 404, NYC, NY 10010 ($1.00/issue).

NATIONAL RURAL POLICY is the subject of a report issued by the Carter Administration last December. For a free copy of the report, write the Office of Intergovernmental Affairs, White House, Washing­ton, DC 20500. Ask for “The Carter Administration’s Small Community and Rural Development Policy.”

CONDOMINIUM CONVERSION: Shelterforce, a national housing publication, has published an excellent two-part series called “Condomin­ania” by John Atlas with Peter Dreier, analyzing the condominium problem and suggesting solutions for how to fight back. To obtain copies, contact Shelterforce, 380 Main St., East Orange, NJ 07018, (201) 678-6778.

SEEKING JOB (from Hugh Broadbent, 17 Kingswood Ave., Newcastle-upon-Tyne, NE2 3N5, ENGLAND): “I am interested in being given the chance to apply for planning jobs, particularly those involved with community development. For the last two years I have been a leader of a team of city officials, councilors, and local representa­tives of the community in Newcastle-Upon-Tyne. Duties involve coordina­tion and implementation of community development projects. The aim is to positively discriminate in favor of certain poorer neighbor­hoods with the many services provided by the city and with a special budget available to the community. I also have three years’ experience with land use planning and development control.”

COMMUNITY JOBS is a monthly publication of The Youth Project. Each issue lists progressive public interest and community-oriented job openings in the U.S. It serves as a “trade journal” for those interested in or interested in this type of work. For more information, contact Com­munity Jobs, 1704 R St. NW, Washington, DC 20009.

The organization is a grassroot, Alinsky community group (2,000 members) in Chicago's northside comprised of middle class tenants on the east side and working class tenants on the west side. Because of its multi-issue nature, the research I do focuses on a range of community issues: crime, insurance redlining, and real estate speculation. Studied social policy at the University of Chicago. I am interested in continuing work with community groups, eventually forming a neighborhood technical assistance group. I am in a study group of other Alinsky organizers trying to develop a socialist alternative to Alinsky.

R. BOUX, 204 Iranistan Ave., Bridgeport, CT 06604. "I am a Librarian (Fine Arts) and Assistant Professor in the Art Department and I teach a course in Modern Architecture and Urbanism. Apart from citizen participation, my chief concern is in finding out how to keep the art in architecture and planning from being cannibalized by the social sciences.

LEW BOWERS, NECTI, 216 Crown St., Rm. 404, New Haven, CT 06510, (203) 776-0451/562-3551. My particular interests focus on how organizations can be structured so they maximally meet the needs of both consumers or clients and the workers. I am interested in various forms of experimental organizations such as worker ownership, coops, community businesses and collectives, in the process issues around styles of leadership, decision-making and accountability. My personal goal is to develop a working model of DEMOCRATIC MANAGEMENT.

PRENTICE BOWSHER, 1522 Conn. Ave. NW, Washington, DC 20036, (202) 265-8522. After three years with a self-help, low income housing group in Washington, D.C., called Jubilee Housing, I have formed a new consulting firm to nurture and support similar efforts elsewhere. One of my first clients happens to be Jubilee; and for it I am trying to identify other self-help, low-income housing groups in major cities around the country. The housing can be single- or multi-family; the keys are that the residents be poor, and assume some real control of their housing, through ownership, rehabilitation, management, etc. A name, address, phone, contact person, and brief description would be sufficient. I would follow up as appropriate."

MICHAEL STONE, Coll. of Public & Comm. Serv., U. Mass., Boston, MA 02125. Recently finished a long article on housing for Socialist Review. Also actively involved in the Boston Urban Analysis Group, which is a group of about a dozen socialist housing activists and planners, doing research and analysis of Boston’s political economy, physical development and housing. During the past few months we have worked on developing a housing platform for Boston, which was presented at a “Conference to Stop People Removal” in Boston. Marie Kennedy, some students and I have been working for the Tenants Policy Council, documenting the need for public housing in Boston, and countering the myths that family public housing can’t work and that private, mixed-income housing is a great alternative to public housing. Finally, I have been doing some work on “Shelter Poverty,” an approach I have developed to housing affordability with the cost of meeting non-shelter necessities at a minimum level of adequacy.

PEG STONE, 407 North St., Oakland, CA 94609. I work at the National Economic Development Law Center, which provides technical assistance to low income community groups in economic development. I work on CDBG’s women’s issues, credit unions, welfare reform and other subjects. I am writing a book on use of Block Grants by community organizations.
